Profile

I'm a passionate software engineer with a year of experience in full-stack web development. My expertise spans designing and building scalable web applications (using modern frameworks like React and Echo/Express) and experience with DBMS technologies like Redis, PostgreSQL and MySQL.

Professional Experience

11/2024 – 05/2025
USA

Junior Full-stack Developer (Startup)

Prim/Hashim (LunarProxy) 🔗

- Redesigned websites to optimize navigation and increase visual appeal (**boosting traffic by over 2x!**).
- Enhanced website speed and scalability
- Utilized **Git** and **Figma** for effective collaboration.

Projects

seekehr.github.io 🔗

Hyflip

 🔗

A paid product that was later open-sourced, a powerful auction sniper written in Golang, and paired with a client-side mod written in Kotlin and a website.

ZeqaStores

 🔗

ZeqaStores is a sleek e-commerce platform built with the MERN stack.

LoanTracker

 🔗

A full-stack SaaS application for loan management, leveraging React/Tailwind UI, Express.js REST APIs, MySQL for relational data, and Redis for low-latency caching.

DevSpoofGO

 🔗

A C++/Golang dll injector that spoofs your device information for (non-commercial) programs, utilising WinAPI/Reg/WMI methods.

NotTwitter

 🔗

A twitter inspired clone that uses a retro-themed UI and the MERN stack.

pfpm

 🔗

A path-finding algorithm utilizing A* and other advanced algorithms for optimal navigation for entities.

PoggitPE

 🔗

Automated PocketMine-MP plugin downloader utilizing API endpoints from Poggit, with anti-abuse features like rate limiting and request validation, and a dynamic metadata parser for real-time plugin info.

RedditVideoMakerBot-Updated

 🔗

Updated a really cool project to automatically generate reddit videos. Fixed bugs, added comment support, text customization, keyword searching, PRAW BFS optimised searching, etc etc.
